| Bullet speed | 260 + 15 m per sec. |
| Minimal distance of application for alive target | 3,5 m |
| Scattering diameter when shooting for the 5 m distance | no more than 100 mm |

**9 mm calibre
SAFARY 820 G**

Recharge principle – tip-up drum. Impact-trigger mechanism of dual action.

The distinctive peculiarity of the revolver from a gun of any modification is:

- cartridge introduction is mechanically implemented;
- the powder gases' kickback energy is used for recharging;
- there is possibility of usage of sound and gas cartridges as well as cartridges equipped with the bullet of traumatic effect in any succession;
- A supplementary insertion is needed in the channel of the barrel when shooting with the sound and gas cartridges, which excludes the possibility of simultaneous shooting with the cartridges equipped with elastic bullet, the insertion needs to be dismantled from the channel of the barrel.

Various performance of weapon handle is available (wood or plastics), chromium-plating or blueing of the weapon surface is available. There is possibility to complete the revolver with the holster for belt carrying or for hidden carrying as well as with the cartridges equipped with the rubber bullet of the "Teren 3 P" 9 mm type.

The weapon price does not include the transportation and declaration costs.

Attention! We would like to draw Your attention to the quantity of the weapon we manufacture at the moment.

| | |
|---------------------|-----------------------------|
| Altay | 1200 pieces per year |
| Ideal SP 686 | 240 pieces per year |
| Apache | 1200 pieces per year |
| Safari 820 G | 5000 pieces per year |

To manufacture more weapon we shall need time to increase the production capacities.
